Pinpoint GraphMerge: Problems printing footer messages, page #s

=====

Problem:

GraphMerge would incorrectly handle page footers in an AppleWorks document. In reality, the footer was handled correctly, but the following line of text from the document would disappear from the document. In addition, the page numbering scheme would be incorrect.

Solution:

1. Have the user send back the disk for version 1.2 or greater, the problem has been resolved.
2. Have the user avoid page numbers and footer messages in the interim.
